

If you need a gel imaging system packed with features usually only found in more expensive models, then Syngene's new **GENi** system is the one for you.

With a **GENi** you'll get all this:

- Compact darkroom with built-in touch screen
- Fully motor driven camera
- Fully motor driven zoom lens
- Six position motor driven filter wheel
- Slide out transilluminator for gels up to 16 x 21cm
- Fold down white light pad with auto switch on/off
- Powerful integral processor
- USB, Network connections
- Auto-exposure control

Using the touch screen you can control the camera, optics and filters. The 16 bit images can be annotated, saved and printed. You'll not find another gel doc system offering this amazing performance at this level, so get in touch now to put a **GENi** to the test.
